Portfolio: <https://niccolosaurus.github.io/new-professional-portfolio/>

As a dedicated Full Stack Web Developer, I specialize in creating dynamic and user-friendly web applications using JavaScript, HTML, CSS, and React. With a strong foundation in both design and development, I am committed to enhancing user experiences and bringing innovative digital solutions to life. I am eager to contribute my skills to a team that values creativity, efficiency, and cutting-edge technology.

Experience

Full Stack Web Developer

Family Proud

San Diego, CA | 06/2022 - Present

- Developed and enhanced a React Native mobile app, focusing on improving the SaaS Admin Portal's functionality and user experience.
- Enforced best practices in software engineering, including code reviews and unit testing, ensuring high-quality, scalable, and reusable code.
- Played a key role in the QA process, incorporating Detox for automated testing and rigorous manual testing strategies.
- Collaborated with product owners to understand detailed requirements, owning the code from design through to implementation, test automation, and delivery.
- Implemented and refined a new user sign-in and onboarding process, streamlining the user journey and improving engagement.

Red Pill Rick

Freelance | 06/2022 - 08/2022

- Developed a responsive website using React, Bootstrap, and HTML, focusing on inline CSS for an e-commerce client.
- Implemented SEO best practices to optimize website visibility and performance.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6), TypeScript

Frameworks/Libraries: React, Bootstrap, SQL, Mongo, APIs, NPM, GraphQL, React Native, Detox, Sentry, Node.js

Tools & Technologies: REST, SOAP, Cross-Browser Compatibility, SEO, Google Cloud Platform

Projects

National Parks Project | <https://github.com/niccolosaurus/National-Park-Project> | <https://seyaryu.github.io/National-Park-Project/>

- Front end site using Google Maps and the National Parks Service API showing all the national parks in the United States. You are able to search the parks and get information on them.

Slither-In | <https://github.com/niccolosaurus/slither-in> | <https://slither-in.herokuapp.com/>

- Full stack site created as a tool for reptile breeders to keep track of their animals. It works as a journal with categories like species and sex as well as color and notes.

Zooventure | <https://github.com/niccolosaurus/zooventure> | <http://zooventure.herokuapp.com/>

- Full stack site with an interactive map that was created "for" the San Diego Zoo. You can sign up, login, and add animals to your daily plan and profile. It includes a picture, description, and a fun fact about all the animals on our site. As an admin you are able to create a marker and delete a marker as well

Education

University of California, San Diego: Web Development Coding Bootcamp

San Diego State University: Bachelors of Science of Biology with emphasis in Zoology
