Full Stack Web Developer with a background in biology and zoology. Acquired coding boot camp certificate through UCSD Extension. Created multiple projects using the Google Maps API in both JavaScript and React.js. Great organizational skills with an extensive background in project and time management. Possess leadership and customer service skills.

Technical Skills

Languages: HTML, CSS, JavaScript(ES6), TypeScript
Applications: Insomnia, Node.js, MySQL, MongoDB Compass, Git, Heroku
Skills: Handlebars, React.js, Bootstrap, Bulma, SQL, MongoDB, Express.js, APIs, NPM, GraphQL, React Native

Projects

National Parks Project | https://github.com/niccolosaurus/National-Park-Project | https://seyaryu.github.io/National-Park-Project/
- Front end site using Google Maps and the National Parks Service API showing all the national parks in the United States. You are able to search the parks and get information on them.
- My responsibilities on this project was implementing the Google Maps API with the coordinates of the National Parks, I also worked on the CSS.
- JS, Modals, National Parks Service API, Bootstrap, Google Maps API

Slither-In | https://github.com/niccolosaurus/slither-in | https://slither-in.herokuapp.com/
- Full stack site created as a tool for reptile breeders to keep track of their animals. It works as journal with categories like species and sex as well as color and notes.
- I worked on the front end, creating the categories and pages, as well as the styling using Bulma.
- JS (HandleBars), SQL, MVC, NPM, FireBase, DropZone, Bulma, Node.js

Zooventure | https://github.com/niccolosaurus/zooventure | http://zooventure.herokuapp.com/
- Full stack site with an interactive map that was created "for" the San Diego Zoo. You can sign up, login, and add animals to your daily plan and profile. It includes a picture, description, and a fun fact about all the animals on our site. As an admin you are able to create a marker and delete a marker as well
- My main task was creating the seeded information for the animals, and integrating it with the Google Maps API. I also worked on CSS and helped other group members with smaller tasks.
- JS (React), Google Maps API, MongoDB, Express, Node.js, GraphQL

Experience

Full Stack Web Developer   **06/2022 - Present**
Red Pill Rick
- Worked with React, inline CSS using bootstrap, and HTML

Family Proud
